Sanitary File No. 35 of 1919-21

Serial No.

1 From the Sanitary Comr. in Lucknow No. 9 C 47 d 12-8-19.

Forwards copy of the Hakeem Sb's letter & recommends sanction of a special grant of Rs 1500 for each of the years 919-20 & 920-21 for the improvements of the Chamarpa- hara Tank

1 The Md. Sb pleads mainly men to allot 50% of the cost as required by rule 7 of the rules published vide G.O.No. 9-5-371-66 San 47-47-6 d 2.9.18 He states that they approached the Duran during his recent visit & requested a special grant of Rs 6000 but the Md. Sb recommends that in the alternative a sum of Rs 4500 may be sanctioned for 2 years from the Lake Fund

2 The Sanitary Comr recommends a special grant of Rs 1500 for each of the years 919-20 & 920-21 from fund allotted for Town Improve- ments

3 In the budget for 919-20 a sum of Rs 25000 has been allotted for Sanitary Improvements. There is no

NOTE—Contn. sheet

Serial No.

heading as "Town Improvement"

4. This may, if approved, be sent to the Financial branch, for note of the sum of Rs 2000 asked for by the Sanitary Comr may be made available from the funds allotted for Sanitary Improvements

9/8 5. I think there is a provision of Rs 75000/- for San[d] Improvements

18/8 Please check the Budget. d.S.G. speak & put up.

MK 9/8

6. The State budget shows that a provision of Rs 75000 was made for 1918-19 & that an allotment of Rs 25000 only has been made for this year

21/8 7. The Enclosure & the Sanitary Comm's letter explains the case clearly. The Mulky is not prepared to contribute 50% of the cost involved owing to paucity of funds. Whether the case may be treated as a special case or not is a point for orders.

8. It is not clear under whose control the sum of Rs 25000/- provided in the budget

12

Letter No.C.282 L.F. dated the 24th June 1919 from the Deputy Commissioner, Hassan District to the Sanitary Commissioner in Mysore, Bangalore.

In forwarding herewith copy of this office letter No.C.8 dated 19th June 1919 addressed to the Chief Secretary to Government on the -- question of drainage and other improvements suggested for the Chamarayapatna town, I have the honour to enclose herein the estimates amounting to Rs. 4007/- prepared and submitted by the Municipal Council and to -- request that you will be so good as to move the Government to accord their early sanction to these works which the Municipality have definitely --- resolved to carry out during the next two years.

Regarding the question of the Municipality being prepared to meet not less than 50% of the cost out of their own revenues as required by Rule 7 of the Rules published with Government Order No.G.5321-44 San. 47-17-6 of 12th September 1918, the Municipal Council bring to notice the fact that a sum of Rs. 1288/- has been already spent by them for similar Sanitary improvements during the years 1917-18 and 1918-19 and that being quite unable to allot funds similarly in the coming years for these urgent improvements, they approached the Dewan during his last visit, for sanctioning a state grant and accordingly request that a special grant to the full extent of the estimated amount of Rs. 4000/- may be sanctioned.

The Amildar and President of the Municipality recommends that in the alternative, a sum of Rs. 1500/- at least, per year, may be sanctioned for 2 years from state funds, as the works are of an urgent nature and I solicit early favourable action in the matter.

Report to accompany the Estimates for opening out new roads and Constructing drains in Chavakacheri Municipality.

As it is proposed to open 3 new roads across the trench to the East of the Fort to join the streets viz, Contractor Ramanias Street, Street in front of Nesavadevan Temple and Mariyadi Street with that running by the side of the trench referred to above and to Construct Stone masonry drains across and along the newly formed roads, Estimates amounting in all to Rs. 1030/- making therein provisions for all necessary items have been prepared and submitted herewith. By opening these roads and constructing drains, the Town will be improved to a very great extent by having free passages of air &c. after dismantling the fortwall and all sewage and Storm water of Fort portion of the Town will be led direct to the Annaikere Sluice Channel

Report to accompany the Estimate for dismantling the fortwall and filling the insanitary portion of the trench lying to the East and the North of Fort, Tuticorin municipality.

The trench referred to above measures at present 970 ft. long, 40 to 90 ft. broad and 9 to 16 feet deep. The sewage water and the rainwater from the fort portion of the town get into this trench and, there being no outlet, stagnate thereat one throughout the year fouling the whole atmosphere by the diffusion of noxious smell, especially in summer. This has become a hotbed for breeding mosquitoes whereby the town is rendered malarial. Now, the bed of the trench being at a lower level than any other place around it, it is impossible to drain off the water unless the bed is raised to the level at least one foot higher than that of the drain to be constructed for leading the outlet water from Kalyani (Drinking water pond).

Necessary levels have been taken and plotted on the enclosure. Also an Estimate amounting to Rs. 14777/- has been prepared for

for the above purpose and enclosed
herein.

Report to accompany the Estimate for Constructing Stone drain to lead the outlet water of Kalyani (Drinking water pond) in Chamaraja patna Municipality.

The pond gets its supply direct from the Amanikere through the Soapstone pipes fixed underground. At present, the outlet water from the pond finds its way into the trench on the Eastern side of the ~~Dirt~~, where the depth of water gauges from 4 to 6 feet. It stagnates there throughout the year and vegetable matters putrify therein and effuse noxious Smell, polluting thereby the whole atmosphere. This has become the breeding place for mosquitoes, rendering the Town malarial. The trench is situated by the side of important roads and people have to walk with great reluctance on account of stinking Smell from the trench. To prevent this, it is now proposed to divert the Course of this Surplus water to the Amanikere Sluice Channel. As shown in the accompanying plan an earthen drain has been excavated and water Course diverted. The Sides have to be revetted with Size Stones to avoid Slipping of sides, and bottom Concreted (giving ∪ shape) with Cement plastering over to put a Stop to water Soaking into the ground and Stagnating there. Giving a

Slope

Slope of 2 to the sides from ground level and turfing thereof are quite necessary. It is proposed to Construct a brick masonry Cistern at the Commencement of the drain (with necessary Steps thereto) for washing purposes

For the above purpose, an Estimate (Rs 500/-) has been prepared and enclosed herein for Your perusal.
